

Transparency Report Q1 2020

Main take-aways of the quarter:

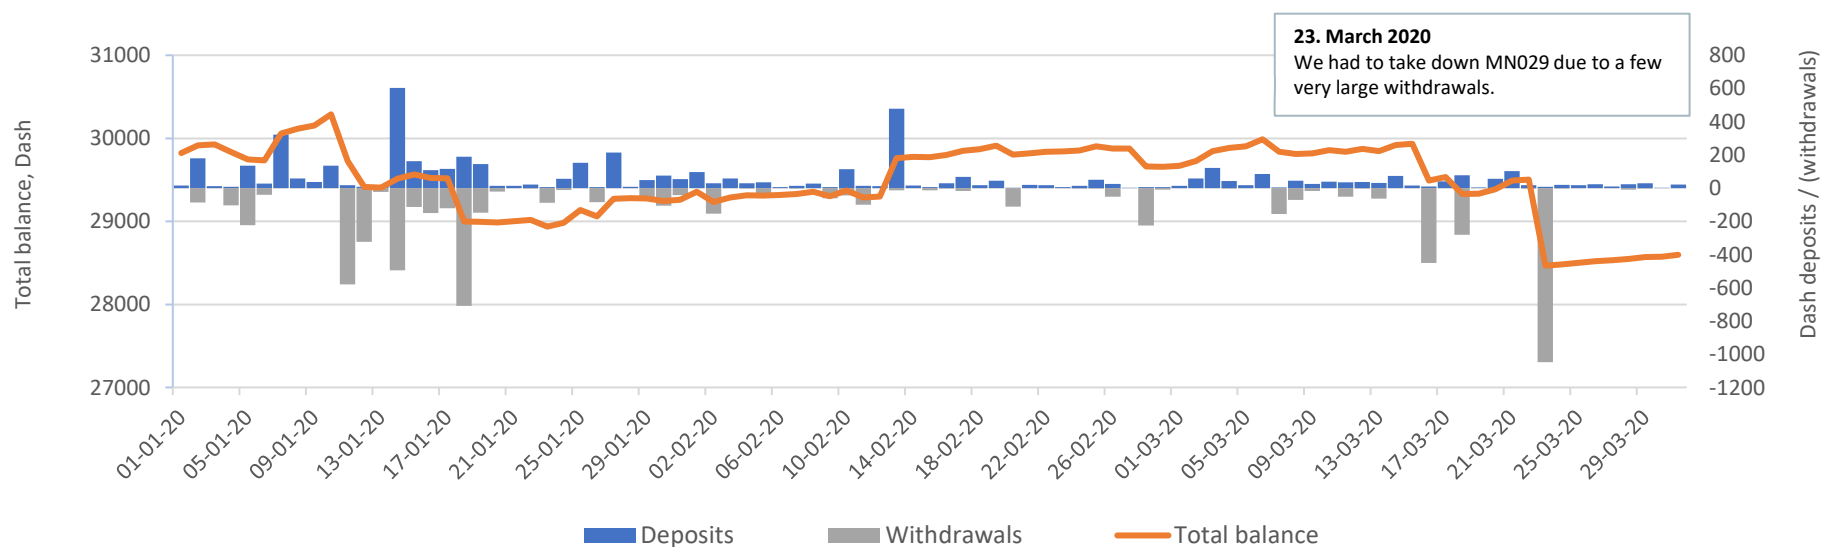

- On January 5th the CrowdNode pool of Masternodes reached a milestone: Reward #1000 since CrowdNode started in 2018.
- Covid-19 started to have an impact during March where activity declined significantly. Due to a few very large withdrawals we had to take down masternode 29 in late March.
- Almost no "Do nothing" votes were cast, thus nearly the CrowdNode masternodes voted on all three rounds and typical vote amplification was around 3x.

## Incidents:

- During Christmas we scaled 14 of the nodes down to 1Core/1GB (with 4 GB page file) as an experiment to see, if it would be possible to optimize cost of running, but a handful received a PoSePenalty, so we scaled them up again.
- During the update we subsequently experiences corruption in some of the Governance.dat-files. We have been in contact with Dash Core Group in order to resolve these issues.
- MN007 was PoSe banned and was up and running soon thereafter. Apparently a log issue made the masternode go down during the night.
- We have momentarily experienced smaller issues with the job engine, which caused a delay in properly validating Dash addresses and recognizing deposits.
